

Future Projects

The Orbus Mission Primary and Secondary Schools

The Orbus Centre

Ngumbe, Malawi, Central Africa

Existing Strong Foundation: First started as a community orphan care ministry in Malawi in 2007 Orbus has since established an income producing, self-sustainable project on a 15-acre property at Ngumbe, Malawi which, in partnership with the *Church of Central Africa Presbyterian (CCAP) – Blantyre Synod*, is educating over 600 students and employs 38 local teachers and staff.

Rapid growth in student numbers has led to the need for more facilities and resources. As of 2021 no regular funds were required from Australia to support the day to day operating costs of the schools. This now enables Australian donors to focus on these new facilities, improved resources and new programs at the schools as well as planning for future projects.

With the existing 15-acre Orbus property at Ngumbe, a readily available source of water, good staff and local labour supply, good local contacts and partnerships, and established good governance, Orbus Australia's future enterprise and job creating program in Malawi is ready for launch in 2023/24.

Orbus Future Projects 2023 and Beyond: Employment Generating Enterprises and Projects in Malawi

Future enterprise projects in Malawi:

Having completed their schooling at Orbus many of the students are faced with limited employment opportunities. Orbus Australia would like to try to develop enterprises in Malawi to create jobs. It is hoped the Enterprises will generate profits which can then be used to sustain new ministry and community development projects.

Suggested Possible Enterprises:

- Establish the Orbus Trades and I.T. Skills Centre.
- Establish an income generating eco-tourism project.
- Distribute and install solar panels and batteries.
- Make and distribute fuel-efficient stoves.
- Establish a University (new or a campus of an existing university at Ngumbe).

Suggested Possible Projects to be Funded by Enterprise Profits and/or Donations:

- Large-scale tree nursery and planting.
- Establish new, and maintain old, clean water wells with pumps.
- Build small homes for orphan or grandmother led families.

Background:
The Orbus Centre
Daniel Village, Ngumbe, Malawi

- Nursery Class
- Primary School
- Secondary School
- Small-scale farm

As of 2022 there are 632 students; 38 teachers and staff; 153 Boarding students. 98 orphans and vulnerable children (OVC).

Most recent project:

Orbus Mission Secondary School

Opening ceremony 13th September 2017. 1st class started 25th September 2017.
1st Secondary graduates September 2021.

Gradual growth from small beginnings in Malawi in 2007.

The 1st class to start at Orbus.
Kindy (Nursery) class 2010.

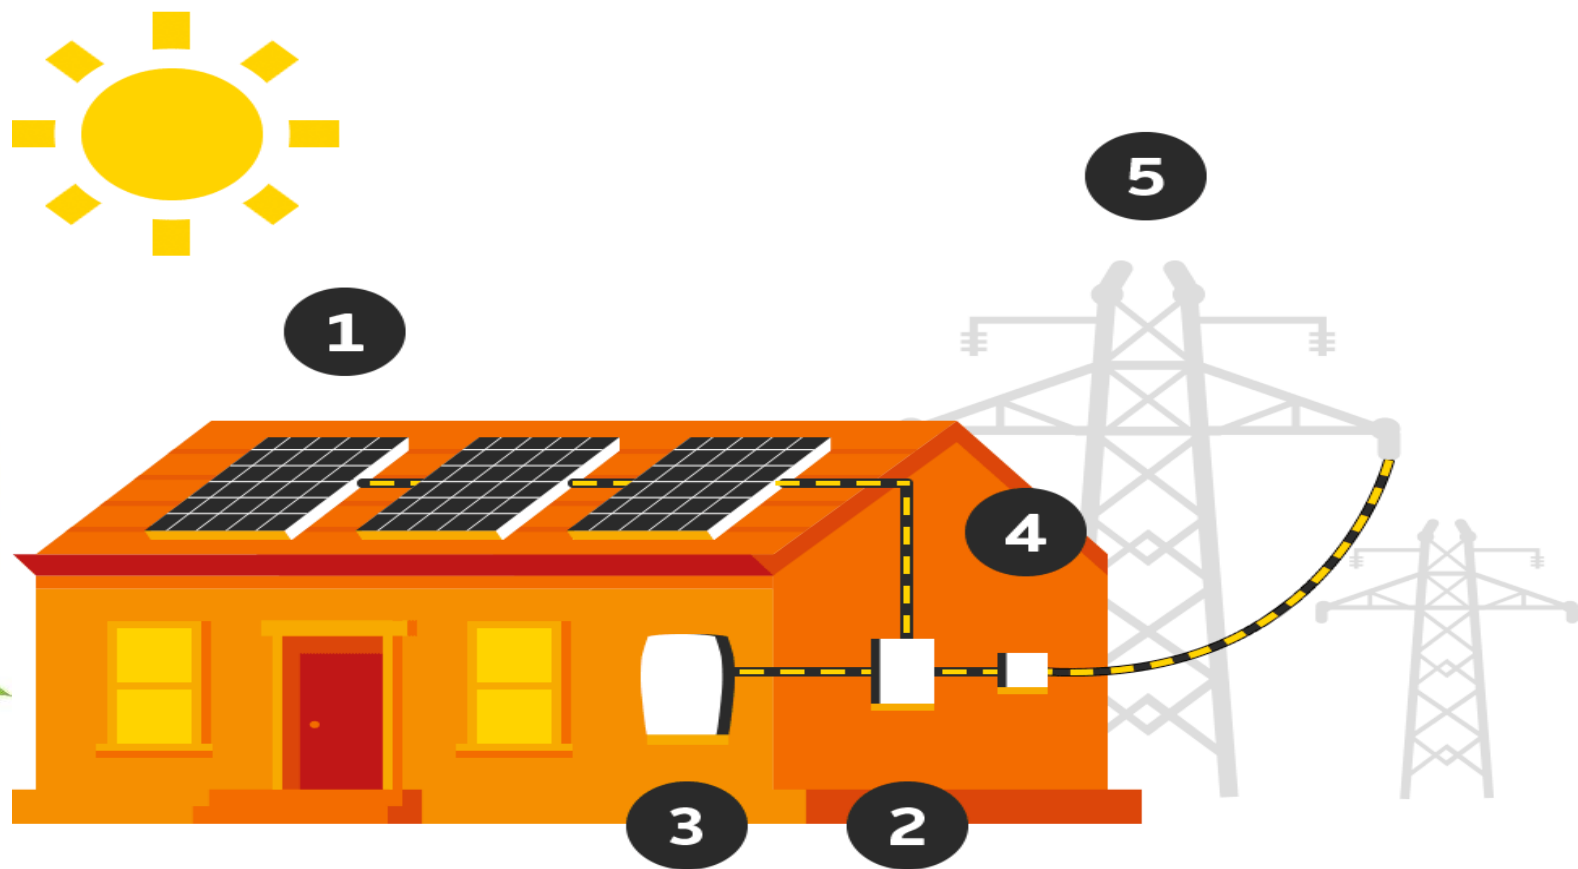

Graduating Class of 2021. The 1st class to graduate from the Orbus Mission Secondary School.

Orbus Trades and I.T. Skills Centre – The Plan: Provide training in trades at the Orbus Ngumbe site. Combined with enterprises such as solar panel and battery installation, repairs and sales. Helps the environment and provides further employment opportunities.

Solar Panels

The Plan: Distribute and install solar panels to provide free clean energy in rural and needy areas.

Small Eco-tourism project:
The Plan: Build a small tourist cabin/s in Malawi to generate income to fund ongoing community development projects.

Trees.

The Plan: Climate friendly project to grow (and buy) thousands of trees every year and plant them around Malawi. Helps the environment and employs locals.

Stoves:

The Plan: Make and distribute climate friendly fuel-efficient stoves to dramatically reduce the burning of wood and clean up the air quality.

Water.

The plan: Provide fresh drinking water in areas of need by digging wells and installing pumps and restoring old and broken pumps. Fresh water for villages for drinking and for planting trees.

Houses for orphans.

The plan: Build small homes for child-headed and grandmother-headed families of orphans in their villages.

How You Can Help:

Donations for the **Schools** and **Orbus Future Projects (OFP)** including wells/pumps, solar projects, tree planting, fuel-efficient stoves, building orphan homes, skills development centre and university are tax deductible in Australia as part of Orbus' commitment to providing relief and development in Malawi.

Donations are specifically now being sought for the **Orbus Future Projects**.

As a not-for-profit, volunteer run charity Orbus in Australia has historically had almost no administration costs. Since 2007 close to 100% of donations have been used directly for projects. No Australian management or volunteers have been paid or had their expenses paid from general donations made to Orbus. However, given the planned OFP expansion it may be that a paid worker will be required to help implement the new projects from 2023 or 2024.

If you are interested in supporting the **Schools and/or Future Projects** please specify on your donation.

Tax-deductible donations can be made by Electronic Funds Transfer:

A/C Name: Orbus Ministries Australia Inc

Bank: Bank of Melbourne/Westpac

BSB: 333 038

Account No: 553 913 774

Ref: (*FutureProjects/Schools*)
